

# 2022 Long-billed Curlew Survey in BC

## *Call for participants*

Do you want to take part in an **exciting, volunteer-based, roadside survey of Long-billed Curlews in British Columbia this spring?**

- **Why:** We need to know how these listed birds are doing to determine and update their conservation status. A province-wide population estimate hasn't been made since 2005!
- **How:** Single-day roadside surveys conducted along ca. 30-km transects within known grassland and croplands.
- **When:** Between April 23-May 8, with dates progressing from south to north.
- **Where:** Okanagan-Similkameen, Thompson-Nicola, Cariboo-Chilcotin, Prince George-Nechako, and East Kootenay regions.
- **Who:** Teams of 2-3 people who can identify curlews by sound and sight. **Training will be provided virtually in March for all participants.**
